Applicant

SERVICES PETROLIERS SCHLUMBERGER et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

#### 4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

International application No. PCT/EP 03/07391

POINT V

- V-1. D1: US-3754609 discloses a stabilizer (26) designed to be slid onto a rod (150), comprising at least one elastic part (col.5, l.56-64) that can be deformed when the stabilizer is held in an initial position in compression against a shoulder (152) of the rod, this elastic part compensating for play that may appear later between the stabilizer and the rod (col.5, l.65-68).  
The subject-matter of claim 1 does therefore not meet the requirements of novelty in the sense of Art. 33(2) PCT.
- V-2. D1 also discloses a rod (150) that will be fitted with at least one stabilizer according to claim 1, wherein the rod comprises a shoulder (152) that will cooperate with the stabilizer.  
The subject-matter of claim 12 does therefore not meet the requirements of novelty in the sense of Art. 33(2) PCT.
- V-3. D1 also discloses an assembly formed from at least one rod (150) according to claim 12 carrying at least one stabilizer (26) according to claim 22, wherein it also comprises external means (138, 144) contributing to holding the stabilizer (26) in compression with the shoulder (152) of rod (150).  
The subject-matter of claim 22 does therefore not meet the requirements of novelty in the sense of Art. 33(2) PCT.
- V-4. D1 also discloses the subject-matter of claims 2-4, 6, 7 (ribs 172 form longitudinally oriented projecting parts), 13-15, 17-19, 23. The subject-matter of said claims does therefore not meet the requirements of novelty in the sense of Art. 33(2) PCT.
- V-5. Dependent claims 5, 8-11, 16, 20, 21, 24 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step.
- V-6. Following defects are pointed out:
- Rule 6.3b)i) and ii) PCT: incorrect two part form of independent claims with regard to D1.
  - Art. 6 PCT in combination with PCT GL 3 III-4.3 a: statement in the description p.15, l.1-4 should have been excised.
